### About Me

To obtain a fresher position as a software engineer in a fast-paced organizations where technical skills and creative thinking are useful.

A highly motivated software engineer seeking to get a position in a reputed company, where I can use my skills and knowledge to learn new things and grow as a software developer.

### Professional Experience

#### Internee– Erbil International Airport (EIA)

July 2021– September 2021 /Part Time

I took part in training this summer at the international airport of Erbil. They taught us how to connect cables together and how to cut fiber optic wires using a splicer. I learned how to connect to a network as we connected wires from different buildings. We went into the servers room to see how everything worked, they also taught us some basic web programming but most of the parts were network related.

#### IT teacher–Barz private school

Sep 2022–present

- Managing highly educated and talented students for designing and creating simple games from scratch, also studying the basics of programming and logic design.
- Creating a guessing game from scratch, the game will give you some trivia questions that you can answer.
